

SPORTS TURF PROGRAM

APPLICATION RATE:

For Sports Turf Managers. Use On Athletic Fields, Race Tracks, Sports Fields & Parks.

Growth Products comprehensive Liquid Sports Turf Program is designed to provide long lasting nitrogen release, matching turf nutritional needs and labor saving spray timing. With 2 to 3 spray applications per season including Growth Products proprietary slow release nitrogen, nutrient availability will extend from early spring through late fall. All liquid fertilizers are compatible with spring fungicide and summer herbicide/insecticide programs. This program may be used on all cool transitional and warm season grass species.

BENEFITS OF SPRAY FEEDING:

- Combine Growth Products liquids with spring fungicide or summer herbicide/insecticide program.
- Reduces labor costs by eliminating time consuming granular applications.
- Provides immediately color before a sports event.
- No phytotoxicity or tracking problems associated with granular products.
- X-Xtra Iron along with herbicide and PGR applications reduces yellowing.
- Essential® Plus improves both soil characteristics, reduces compaction and efficiency of fertilizer programs.
- With Nitro+K, high potassium product in the late summer/fall will improve winter stress.

TURF MAINTENANCE			
Products	Rate Per Acre	Timing	Comments
Nitro-30 with 85% SRN	3.4 - 7 Gallons 1/4 - 1/2 lb N	Spring, Summer, Fall	Long lasting residual Nitrogen release for up to 12 weeks
OR			
Nitro+K (22-0-16)	6.3 - 12.6 gallons 1/4 - 1/2 lb N	Spring, Summer, Fall	<ul style="list-style-type: none"> • Low Salts, No Chlorides • Potassium rich • No Surge Growth!
WITH			
Essential® Plus 1-0-1	1 1/3 gallons 4 oz/ 1,000 sq. ft.	Apply 4 times per growing season	<ul style="list-style-type: none"> • 100% Natural Organic Soil Amendment • Biostimulant and Stress Reducer
	1 1/3 gallons 4 oz/ 1,000 sq. ft.	New Seeding or over seeding	<ul style="list-style-type: none"> • Hasten and increase seed germination
BioNutrients 8-0-9	1 - 8 oz packet	Spring, Summer, Fall	<ul style="list-style-type: none"> • Beneficial Soil Bacteria • Organic carbon rich materials • Improves soil structure
Add A Micronutrient			
X-Xtra Iron 10% Fe with 4% Sulfur	5 qts per acre 4 oz/ 1,000 sq. ft.	Before Tournament	<ul style="list-style-type: none"> • Fast green up for tournaments • Stress Tolerance and Turgidity
Optional Enhancers			
Cal Mag Max	5 qts per acre 4 oz/ 1,000 sq. ft.	As needed for green up	<ul style="list-style-type: none"> • Ideal for southern warm season grasses Bermuda, Zoysia
