

JUMP START PLANTING PROGRAM

FOR VEGETABLES & SOFT FRUIT

Everything Plants Better With Growth Product's Jump Start Program

Growth Products Jump Start Program combines three powerful products: Bloomtastic Starter Plus 8-32-5, Essential® Plus, and Companion® Biological Fungicide, which will produce visible results, including fast establishment and a strong healthy rooting system. With less shock and stress to your plants, you will increase the survival rates of the plants, which will directly affect yield. When you include subsequent applications of the disease fighting Companion® Biological Fungicide there will be healthier and more productive plants in the field. Give a strong "Jump Start" to your crop and the results can be seen at every step along the way, especially the harvest.

Bloomtastic Starter Plus 8-32-5

- Nothing Else Matches Starter Plus' Quality!
- Unique Starter Fertilizers with Slow Release Nitrogen
